Professional Summary

DevOps & Cloud Engineering enthusiast pursuing a Bachelor of Engineering in Computer Science and Engineering, with hands-on experience in **AWS EC2, Linux (Ubuntu), Git, GitHub, Docker, Docker Compose, Nginx, Bash scripting, and cloud deployment**. Experienced in deploying static and backend applications on AWS EC2, configuring Security Groups and network ports, and using **SSH, SCP, PuTTY, and WinSCP** for remote administration and file transfer.

As a Team Lead for an academic project, experienced in Git repository management, version control, project coordination, and module integration. Strong in problem-solving, teamwork, adaptability, and continuous learning, seeking a DevOps, Cloud, or IT Internship to contribute to real-world projects and grow as a DevOps & Cloud Engineer.

Hands-on Experience

- Deployed static and backend applications on AWS EC2 using Linux, Nginx, Git, and SSH.
- Configured AWS Security Groups, network ports, and basic cloud networking for application access.
- Managed Git/GitHub repositories and practiced Docker, Docker Compose, and Bash scripting.
- Performed remote server administration and file transfers using SSH, SCP, PuTTY, and WinSCP.
- Applied Linux administration, Bash scripting, and deployment workflows in hands-on AWS cloud projects.

Education

Bachelor of Engineering (B.E.), Computer Science & Engineering,

2023 – 2027

Surya Engineering College Mettukadai Erode

Currently Pursuing Final Year

Skills

Frontend: HTML5, CSS3, JavaScript

Programming: Python, Bash Scripting

DevOps: Git, GitHub, GitHub Actions, Docker, Docker Compose, Nginx, CI/CD Pipelines, Version Control, Containerization

Cloud: AWS EC2, Security Groups, IAM (Basics), S3 (Basics), VPC (Basics), Microsoft Azure (Basics), Cloud Deployment

Linux: Ubuntu, CLI, File Permissions, Processes, Cron, Shell Scripting

Networking: TCP/IP, Ports, HTTP/HTTPS, Public/Private IP, SSH, DNS Basics

Remote Tools: SSH, SCP, PuTTY, WinSCP

Deployment: Static & Backend Application Deployment, CI/CD Basics, Infrastructure as Code (Learning)

Currently Learning: Kubernetes, Terraform, Ansible, Prometheus, Grafana

Concepts: SDLC, Agile/Scrum Basics, REST API Basics, Monitoring & Logging Basics

AI Tools: ChatGPT, Claude AI, GitHub Copilot

Soft Skills: Problem Solving, Team Collaboration, Continuous Learning, Adaptability

Projects

SMART COLLEGE AI — Team Lead

04/2026 – Present

- Led Smart College AI development, integrating student, staff, assignment, and AI modules.
- Managed Git/GitHub repositories, version control, code integration, and team workflows.
- Coordinated team tasks, module integration, testing, and project delivery.
- Planned deployment using Linux, AWS EC2, Git, Docker, SSH and Nginx.
- Contributed to project planning, feature organization, and smooth coordination across development stages.
- Supported application testing, debugging, and issue resolution across integrated project modules.
- Organized project milestones, task allocation, documentation, and team progress for timely delivery.
